More Potash Beds in Texas and New Mexico

**Richest Sample Shows 13.3 Per Cent—Distributed Over Eight Counties
—Deposits Taken From Fifteen Wells**

Finding of potash in fifteen additional wells in Texas and New Mexico has been reported by Department of Interior as the result of searches conducted by Geological Survey. This brings the total of wells in which potash has been found in the two States up to fifty.

Laboratory examinations made by the Geological Survey of samples of the deposits from these 15 wells showed, according to a statement issued by the department on June 21, that one sample contained 13.3 per cent of potash and another contained 12.72 per cent. These were, however, the richest among the samples examined.

The full text of the statement is as follows:

Department of Interior, announces discovery of potash in 15 additional wells, distributed in seven counties in the western Texas region and in one county in New Mexico. Reagan, Pecos, and Upton counties each contain three of the wells, Crane County two, and Loving, Midland, and Ward counties, in Texas, and Eddy County, in New Mexico, one each. There are now 48 wells in 17 counties of Texas and two wells in one county in New Mexico, or a total of 50 wells in 18 counties in the two States named that have furnished potash data available at the Geological Survey.

Laboratory examinations of cuttings from these 15 new wells include qualitative tests of 710 samples and quantitative determinations of 217 samples. Of the last named samples 117 yielded more than 1.5 per cent of potash, and 11 yielded more than 5 per cent. Percentages of potash given below are those in the samples as received at the laboratory of the survey. Percentages of potash in the soluble salts are usually somewhat higher,

The richest sample, which contained 13.6 per cent of potash, equivalent to 21.13 per cent of the soluble salts, was taken at a depth of 1,515 feet in the Gulf Production Co., Campbell State well, Reagan County. Another sample, containing 12.72 per cent of potash, was taken somewhere in the interval 1,060 to 1,155 feet in the Mary Baker No. 1 well, Upton County.

\$500,000 FOR POTASH

Sheppard-Hudsneth bill for a five year Governmental program of exploration for sources of potash in the Southwest carrying with it an appropriation of \$500,000 to be expended at the rate of \$100,000 annually, passed the House of Representatives last week. Secretaries of Commerce and Interior are to have joint administration.

Profiteering will be prevented, provided potash is found, by having owners of the lands within a mile radius of the test drilling agree to the two secretaries fixing the price at which the deposits may be sold. Right is given to the Government to determine the price at which the potash may be mined. Five-sixths of the land in West Texas is owned by State of Texas and University of Texas.

Consumption of crude methanol last month was 802,337 gallons, and purchases 604,598 gallons, the largest since October. Production of refined methanol decreased, however, to 477,559 gallons, the smallest monthly output since last July.

German dyestuff manufacturers have consolidated their sales agencies in Mexico into a new corporation known as Cia. General de Anilinas, with offices in Mexico City.

HAWKES RESIGNS FROM GENERAL CHEMICAL CO.

Albert W. Hawkes, executive vice-president of General Chemical Co., has resigned effective July 1. Mr. Hawkes will become associated with Congoleum-Nairn Co., Philadelphia, on August 1.

Mr. Hawkes became engaged with Nichols Copper Co. in the Chicago office thirty-one years ago. When that company was taken over by General Chemical Co. he became Western sales manager of General Chemical Co. In 1915 he was moved to the New York office as sales manager for the entire company. In March 1918 he was elected vice-president and sales director of the company, and retained this position when General Chemical Co. was merged into Allied Chemical & Dye Corp. In 1923 he was elected executive vice-president in charge of affairs of General Chemical Co., the position from which he is resigning. During the latter part of 1921 he was elected vice-president of Wing & Evans in charge of sales of Solvay Process Co. products. He is resigning from this position also.

COMMERCIAL SOLVENTS TO MAKE AMMONIA

One of the two new plants that are being erected by Commercial Solvents Corp. at Peoria, Ill. will be for the manufacture of synthetic ammonia. This is being done to utilize the waste hydrogen that is evolved in the fermentation of corn to produce butyl alcohol and acetone. It has not been decided what form the ammonia will be marketed. Production is expected by the first of the year. The other plant that is being erected is for the production of solvents.

Flaxseed freight rates in carlots from New York Harbor to Buffalo have been found unreasonable by Interstate Commerce Commission.

GLAUBERS SALT

Among this Company's products are:

SULPHURIC ACID

Oil of Vitriol

Oleum

Mixed Acid

Battery Acid

MURIATIC ACID

(Hydrochloric Acid)

NITRIC ACID *

ACETIC ACID

Commercial, Redistilled,

Pure and Glacial

And other Heavy Chemicals
of Standard Purity

REAGENT CHEMICALS

INSECTICIDES &

FUNGICIDES

Beyond the standard purity of this much used General Chemical Company product, and of almost equal importance to the purchaser, is the superior packaging which is standard at all the Company's Works. Strong barrels, well cleated to stand the strains of shipping, or strong bags, deliver the material to its purchaser in perfect condition. This is a measure of that thorough service which maintains the good will of the thousands of consistent buyers of General Chemical Company products.

MAGNESITE HEARING

J. A. Bernhard, vice president of Sierra Magnesite Co., of San Francisco, Calif., and P. E. Schundler, representing Walter Maltz Co., of Jersey City, N. J., and Joliet, Ill., testified in favor of a 50 per cent increase in duties on imported magnesite before the United States Tariff Commission.

Both Mr. Bernhard and Mr. Schundler declared the cost of producing magnesite is gradually increasing each year. They added that although domestic consumption has declined, importations of magnesite have increased.

Walter Gordon Merritt, spokesman for Henry A. Goldwynne, New York; Innis Speiden Co., New York; Anglo-Greek Magnesite Co., London, and Magnesite Syndicate, Ltd., respondent importers challenged the production cost figures of the witnesses. He developed from Mr. Schundler that some of the cost data had been procured from abroad from a representative of Department of Commerce.

George Hamilton and W. J. Thorn, both identified with the American offices, in Philadelphia and New York, of Innis Speiden, Ltd., London, also testified in opposition to an increase on magnesite rates.

Mr. Hamilton said his company was selling magnesite in this country at an average price of \$50 a net ton, although it cost the company \$52.50 a net ton, including overhead and selling expenses.

Chairman Marvin said that evidence would be given careful consideration and then asked both sides to present their briefs and other information to fill certain gaps in the record on or before July 19, 1926.

Agricultural Insecticide & Fungicide Manufacturers' Association, at its annual meeting held last week, voted to launch a publicity campaign and appropriated funds for this purpose. "Insect Control for Profitable Crops" is the slogan adopted for the campaign.

Following officers were re-elected: President, E. T. Trigg; vice-president, T. S. Grasselli; treasurer, H. J. Schnell; secretary, George B. Heckel; Executive committee, E. T. Trigg, chairman; T. S. Grasselli, W. H. Rose, H. S. Parsons, R. N. Chipman, W. H. Simpson.

Robert Campbell, formerly vice-president of Congoleum-Nairn Co., was elected president of Celluloid Co. last Friday.

MANY CHEMICAL PRICES REDUCED IN HAMBURG

(Special to Chemical Markets)

Hamburg, June 30 (By Radio)—Lower prices are named on Sodium hyposulfite, arsenic, Epsom salts, calcium chloride, potassium chlorate and sodium sulfide. Barium chloride has been advanced. A firm market exists for potash alum.

Lang Knitting Mills, Inc., Twentieth Century Knitting Mills, Inc., and Lubinette Knitting Mills, manufacturers of rayon have merged into Twentieth Century Rayon Textiles, Inc. The new corporation is chartered under the laws of Virginia. It is capitalized at \$1,000,000, and is already operating its mills in New York and Petersburg, Va. Officers are Joseph Schoenbaum, President; Harry Fleischer, Vice-President and Secretary; Max Hirsch, Second Vice-President, and John H. Lang, Treasurer.

Benzol production in Germany in 1925 set a new record, according to advices to the Department of Commerce. Production by the 35 members of Benzol Verband (Cartel) of Bochum amounted to 235,000 metric tons.

COOK & SWAN MERGE WITH FRANK L. YOUNG

Cook & Swan, New York, and Frank L. Young Co., Boston, are merging July 1 under the name of Cook, Swan & Young Corp., with offices at 66 Beaver st., New York. Capital of the new concern will be \$1,500,000, made up of 5,000 shares of preferred, and 10,000 shares of common stock. Officers are: President, Gilbert P. Smith; vice-presidents, J. Howard Smith and Dennis E. Bergen; treasurer, Percy L. Young; assistant treasurer, Arthur C. Dunn; secretary, Walter C. Doscher. Directors are Gilbert P. Smith, J. Howard Smith, D. E. Bergen, Percy L. Young, W. A. Robinson, Jr., Walter C. Doscher and Harold Young.

E. V. Peters, recently resigned from New Jersey Zinc Co., effective July 1, has been elected vice-president and director of Tuberize Co., to succeed Bertrand R. Clarke as sales director.

Price Varnish Co., St. Louis, have established a lacquer manufacturing department in charge of G. M. Rizer, formerly of Sewall Paint & Varnish Co.

MATHIESON

Chemicals

Are Your Products Insured?

YOU can get someone else to insure your plant, your equipment, your employees, but how about insurance on the uniform quality of your finished products? Only constant care and vigilance, coupled with the best raw materials obtainable can give this to you.

Among manufactured raw materials, heavy chemicals have been standardized to a remarkable degree, particularly those marketed under the brands of responsible producers. Yet the standard brands of a given commodity are not identical any more than the facilities, resources and service of the various manufacturers.

Much depends upon quality and uniformity in the chemical process industries. Not the least important part of your insurance protection should be the consistent use of Mathieson uniform chemicals.

Deal Direct with the Manufacturer

[Markets & Prices]

ANILINE DOWN 1c LB.; MYRBANE ½c; GAMMA ACID 20c

Formal Price Revisions Made Following Sharp Competition—Other Intermediates Unsettled—Ammonia Water ¼c lb Lower—Barium Carbonate Up—Butyl Acetate, Diamyl Phthalate, Diethyl Phthalate, Ethyl Lactate and Anhydrous Alcohol Down—Copper Sulfate Strong—Chinawood Oil Higher

Advanced	Declined
Barium Carbonate, \$2.00 ton	Acid Gamma, 20c lb.
Chinawood Oil, spot, 1¼c lb.	Alcohol Anhydrous, 6c gal.
Chinawood Oil, coast, ½c lb.	Aniline Oil, 1c lb.
Corn Oil, refined, ½c lb.	Butyl Acetate, 5c gal.
Olive Oil Foots, Ship., ¾c lb.	Diamyl Phthalate, 25c gal.
	Diethyl Phthalate, 4c lb.
	Ethyl Lactate, 25c gal.
	Myrbane Oil, ½c lb.

Industrial chemicals continued in good demand with prices fairly well sustained for this time of year. Aqua ammonia has been formally reduced ½c lb. Spot barium carbonate has advanced to shipment prices. Copper sulfate is in good demand and price advances are anticipated. A large number of lacquer chemicals are unsettled and several price revisions have been made.

Intermediate manufacturers have revised several prices following the sharp competition of the past month. Aniline oil has been reduced 1c lb, oil of myrbane ½c lb, and gamma acid 20c lb. Sodium naphthionate is unsettled, as are N & W acid and several other products.

Light oil distillates remain unchanged. Heavy shipments of toluene against contracts featured the past week. Other crudes are unchanged.

A further strengthening of the chinawood oil market both on spot and on the coast featured the activity in the oil market this week. Factors here state that the consuming demand in this market is not large but that sizeable parcels are passing hands amongst the dealers at firmer figures. Interest is expressed in peanut oil which is higher and quite scarce both on spot and at the mills. Cottonseed is quoted on relatively the same level as last week with some difference of opinion as to the future movement of the market. Aside from these changes the market is fairly active and generally unchanged.

INDUSTRIAL CHEMICALS

Alcohol Anhydrous — Makers name lower prices on anhydrous ethyl alcohol at 55c@60c gal. for drums.

Barium Carbonate—Spot lots are held firmly at shipment prices of \$55.00 ton, which is \$2.00 above last week's prices.

Butyl Acetate—Schedule prices from makers are lower at \$1.50 gal. for tanks, \$1.25 for carlots of drums, and \$1.55 for lesser quantities. The market is unsettled and tanks are reported to have been sold as low as \$1.42 gal.

Copper Sulfate—Quotations are firm at \$4.70@\$4.75 100 lbs. at New York, and 10c less possible at works. Advances are anticipated.

Diamyl Phthalate — Market is lower at \$3.25 gal. Competition is sharp.

Diethyl Phthalate—Leading makers name lower prices of 28c lb for single drums and are shading these figures in quantities. The market is not very definite due to the large quantity of material appearing on the market from second hands.

Ethyl Lactate—Lower prices of \$3.50 gal. are named by makers.

CRUDES AND INTERMEDIATES

Acid Gamma—Leading makers have lowered their quotations by 20c lb and now name \$1.05@\$1.10 lb as to quantity. Competition remains keen.

Acid N & W—Quotations remain unchanged at 95c@99c lb, but competition is sharp and 1,000 lb orders are being taken at the inside price, which is supposed to apply only to carlots.

Aniline Oil—Following the sharp competition of the past month leading makers have lowered quotations 1c lb and name 15c@16c lb as to quantity with the inside price applying to carlots.

Benzene—Market firm and unchanged. Industrial demand is good and the gasoline markets stand ready to absorb any excess offerings.

Myrbane Oil—Some makers have lowered quotations by ½c lb following sharp competition. Offerings are made at 8½c@9½c lb as to quantity with inside figure applying to carlots.

Para-Nitroaniline — Market is fairly steady with quotations at recent reduction to 44c lb for ton lots, and 45c lb for single barrels.

Toluene — Heavy shipments against contracts are reported in some directions. Quotations are unchanged.

Sodium Naphthionate—Market is unsettled. Open quotations are unchanged at 55c@59c lb but these prices are understood to be open to shading with some makers.

OILS AND FATS

Chinawood Oil — Firmer prices prevail though the consuming demand is small and current quotations are: 14¾c@15c lb, spot bbls.; tanks, New York, 11c@11¼c lb and coast tanks 11¼c@11½c lb.

Corn Oil—Firm in all directions with higher quotation noted in some quarters at 15c@15½c lb bbls. New York; tanks at 14c@14½c lb. Crude is unchanged.

Cottonseed Oil — Is generally quoted at 15½c@16c lb for spot P. S. Y. May-Dec. quoted at 15c@15½c lb.

Peanut Oil—Quoted in a nominal way for crude. The spot market is practically bare of stocks with but small parcels at the mills. Refined oil is unchanged.

Olive Oil—Foots are quoted higher in one direction at 8½c lb for shipment. Other grades are unchanged and steady.

Tallow—Is practically unchanged with sales reported at 8¾c lb for city extra; edible at 11c lb.

German manufacturers of yellow potassium prussiate have combined to form a convention. The "Industrie- und Handels-Zeitung" reports that this yellow potassium prussiate convention is now engaged in preliminary negotiations with foreign manufacturers, with a view to securing international agreements in order to safeguard German interests, particularly in view of the importance of this branch of German chemical production.

Baltimore Paint, Oil & Varnish Club held its annual Summer outing on the afternoon and evening of the 29th of June, at Hillendale Club. Arrangements were in charge of Frank A. Warner, Jr., committee chairman, with Milton Hirshberg and Leon S. Hanline as the other members.

Canadian Celanese, Ltd., artificial silk plant, at Drummondville, Que., contract has been awarded to Foundation Co., of Canada, Ltd., and work is to start immediately.

SPOT NAVAL STORES QUOTED LOWER THIS WEEK

Easier Positions Are Followed By Better Buying Which Should Hold Market Up—Blood and Ground Tankage Higher and Firmer All Positions—Nitrate of Soda and Sulfate of Ammonia Quiet and Easy—Dyewoods in Better Demand

Advanced	Declined
Blood, N.Y. 25c unit	Rosin, B, D, F, G, 70c 280 lbs.
Blood, Chicago, 50c unit	Rosin, E, 55c 280 lbs.
Tankage, ground N.Y. 50c unit	Rosin, H, I, 65c 280 lbs.
Tankage, Chicago, 50c unit	Rosin, K, 80c 280 lbs.
	Rosin, M, 95c 280 lbs.
	Rosin, N, 30c 280 lbs.
	Rosin, WG, 40c 280 lbs.
	Rosin, WW, 25c 280 lbs.
	Turpentine, 2c gal.

A gradual easing off in the price of spot rosins and a generally firmer tendency on ground tankage and dried blood were of principal note this week. Nitrate of soda and sulfate of ammonia continue quiet and soft, with fish scrap reported off a bit. Albumens and egg yolk after their recent advances are steady at the present levels. Accelerators and dry colors are moving in some volume but at unchanged figures. A good inquiry is reported for dyewoods but as yet buyers are unwilling to meet the shipment figures.

Blood—In better demand and quoted higher at \$3.75 unit spot; \$4.25 unit, Chicago and \$4.00 unit South American for shipment.

Fish Scrap—Sellers continue to quote \$4.00 and 10c unit despite rumors of easier prices in the near future.

Rosins—Have eased off a bit on spot as was expected with buyers coming into the market more freely again on the decline. Current quotations are: B, \$12.05; D, \$12.30; E, \$13.65; F, \$13.70; G, \$13.80; H, \$13.90; I, \$13.95; K, \$14.05; M, \$14.15; N, \$15.10; WG, \$15.35 and WW, \$15.75.

Turpentine—Has experienced a slight decline on spot to 86c@89c gal. A better consuming demand is noted from varnish makers and it is expected that the present level will be maintained.

Tankage—A good demand and a scarcity of stocks have combined to advance spot prices to \$4.00 and 10c unit. Chicago is likewise higher at \$4.25 and 10c unit with South American firm but unchanged.

Valonia—There are buying orders in the market. Sellers are not disposed to make any concessions and are holding firm at the market quotations.

Wattle Bark—Is also firmer for shipment at \$40.00 ton with some business passing at these figures.

(Special to CHEMICAL MARKETS)

Savannah, Ga., June 28—Turpentine closed on Saturday at 80½c gal. with offerings of 118 bbls. sold to one buyer. The slight daily

decline over the week served to bring more buyers into the market and it is believed here that the larger buyers are taking on contracts for later deliveries as well as current needs, indicating that they do not anticipate a substantial decline. Receipts last week were 5,147 bbls.; sales reported 2,946 bbls.; shipments 2,246 bbls. and Savannah stocks 10,762 bbls.

Sales of 2,349 bbls. of rosin were reported Saturday to two buyers. Prices have fluctuated and were on the decline at the end of the week. The demand has been good and it is not expected that this week will witness further reductions. The finer grades in particular are expected to recover. Rosin receipts this week were: 16,642 bbls.; sales, 12,503 bbls.; shipments 13,347 bbls. and Savannah stocks, 50,022 bbls.

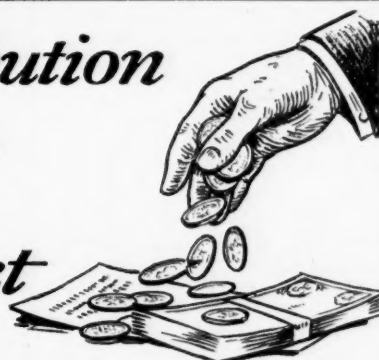

Jacksonville, Fla., June 26 — Turpentine closed firm at 81¼c gal. with sales of 330 bbls. Lower bids were rejected. Local stocks are turpentine, 19,253 bbls. and rosin, 44,669 bbls.

American Wood Preservers Assn., and a committee on wood preservation of American Railway Engineers Association were in convention in Boston last week. Several important discussions were engaged in by such well known factors as E. B. Fulks, vice-president of American Creosoting Co.; O. C. Stienmayer, superintendent of timber preservation of Canadian Creosoting Co. and officials of Canadian National, New York Central and Canadian Pacific railways.

German exports during May totaled 730,000,000 marks, while imports amounted to 703,000,000 marks. Exports during May suffered a considerable reduction due to the decrease in exports of finished products, including textiles.

American Solvents & Chemical Corp. suffered a theft of denatured alcohol valued at \$30,000, from a warehouse of Broadway Warehouse Co., located at Broadway and South 8th st., Brooklyn, N. Y.

A Contribution to your Profit Sheet

EVERY mill using E B G Liquid Chlorine has found that it eliminates wastes in bleaching. These savings may be reckoned in dollars and cents, taking their place in your schedule of profits.

The increase in the quality of production through the use of Liquid Chlorine has made it the standard bleach in textile mills.

E B G SERVICE

Includes abundant production facilities and containing equipment, of course; expert engineering counsel in the use of Liquid Chlorine which would naturally be expected of the pioneer manufacturer.

But beyond these a service which is much more comprehensive than the usual conception. Investigation will reveal the significance of this.

Butterworth-Judson Creditors to Get 10%

Decision Gives Government Priority Over All Other Creditors in Bankruptcy Proceedings—\$130,000 Left to Pay Claims of \$1,200,000

Creditors of the Butterworth-Judson Corp., which went into equity receivership in 1922, will receive approximately 10 per cent upon claims filed against the estate of about \$1,200,000, as a result of a decree signed by Judge Augustus N. Hand in U. S. District Court, awarding the Government \$744,064 in full payment of contractual claims asserted against the company and the equity receiver, and \$75,000 for taxes due United States. The estimate of 10 per cent on general claims was made at the office of Rushmore, Bisbee & Stern, attorneys for Thomas G. Haight, the equity receiver. It was figured that payment to the Government will leave about \$130,000 to pay general merchandise claims of about \$1,200,000.

Entry of the decree had been acquiesced in by merchandise creditors' committee, composed of Harold J. Reig, Edwin M. Allen, W. A. Marshall and E. V. O'Daniel, and its attorneys, Whitman, Ottinger, Ransom, Coulson & Goetz, under an agreement entered into recently with all parties to the Government suit.

The decree was entered in accordance with the decisions of Supreme Court of U. S. holding that the Government is entitled to priority over general creditors in equity receivership proceedings.

Corn Products Refining Co. has declared an extra dividend of 25c per share on the common stock in addition to a regular dividend of 50c per share, both payable July 20 to stockholders of record July 2. A regular quarterly dividend of \$1.75 per share on the preferred stock has also been declared payable July 15 to stockholders July 2. The extra dividend is payable out of the surplus earnings for the first six months ending June 30.

Nichols Copper Co. has sold a large block of stock to United Verde Extension Mining Co. and Union Miniere de Haut Katanga of Brussels. James S. Douglas, president of United Verde, Archibald Douglas and F. Pisart, managing director of Societe Generale des Minerals have been elected directors of Nichols Copper Co.

Archer-Daniels-Midland Co. and subsidiaries report for nine months ended May 31, a net profit of \$1,157,999 equal after 7 per cent. pre-

ferred dividends to \$4.61 a share on 200,000 no par common shares. For the quarter ended May 31, the net profit was \$411,529, or \$1.66 a share.

HELLER & MERZ REPORT

Annual statement of Heller & Merz Co., for the year ended Dec. 31, 1925, is as follows:

Assets: Merchandise, \$920,851; notes and accounts receivable, \$283,165; cash, \$106,645; preferred and miscellaneous, \$48,904; total, \$1,359,565.

Liabilities: Common stock, \$1,000,000; accounts payable, \$24,682; reserve, \$8,729; surplus, \$326,154; total, \$1,359,565.

Paraffine Companies, Inc., are offering common stockholders right to subscribe to new common stock on the basis of one new share for each eight old shares held at 93. This compares with a present market price of 101.

Pennsylvania Salt Manufacturing Co., has declared the regular quarterly dividend of 2½%, payable July 15 to stock of record June 30.

FOR SHOALS BID OF AMERICAN CYANAMID CO.

Representative Almon, (Dem.), of Tuscumbia, Alabama, in a speech in the House, said the country generally and the farmers particularly are disappointed at the failure of Congress to enact legislation at this session for a proper lease and operation of Muscle Shoals for the manufacture of fertilizer.

He also introduced a bill, to authorize the acceptance of the offer of Air Nitrates Corp. and the American Cyanamid Co.

"This bill," Mr. Almon said, "will be offered as a substitute for the Associated Power Co. bill, House bill No. 11,602, when it is considered, unless in the meantime a better offer should be made by Henry Ford or some one else.

"The offer of the American Cyanamid Co. may be amended in some respects before it is offered as a substitute. I have introduced it at this time so that members of the House may have an opportunity to familiarize themselves with its provisions.

Planters Fertilizer & Phosphate Co. won the case against Planters Fertilizer Co. for the right to use the name.
